PERSONAL SUMMARY

Results-oriented and innovative Web Developer with over 1 year of professional experience delivering web solutions using JavaScript, PHP, WordPress, and Drupal. Strong background in building, deploying, and maintaining web applications in Linux-based environments, with hands-on experience using AWS, Docker, and CI/CD pipelines. A collaborative team player with strong communication skills, experienced in working within Agile teams to deliver reliable, user-focused digital solutions on time. Portfolio available at <https://react.jinggu.com.au>.

SKILLS

- Languages: Java, Python, **PHP**, R, Bash, **JavaScript**, TypeScript
- Web tech: **Drupal**, **WordPress**, Flask, RESTful API
- Front end: **React**, Angular, Next.js, **HTML5**, **CSS3**, Material UI, jQuery, **Elementor**, WPBakery Page Builder
- Database: **SQL**, MySQL, PostgreSQL
- Tools: **AWS**, **Docker**, **Pantheon**, Gradle/Maven, **Git**, VS Code, IntelliJ IDEA, Power BI, **Agile/Scrum**

WORK EXPERIENCE

Web Developer

Agileware

Mar. 2025 – Present
Canberra ACT, Australia

- Description: Delivered and maintained web projects for arts, education and member-based organisations, covering custom Drupal and WordPress theme development, CRM form integration, accessibility remediation and production support.
- Technologies: **PHP**, **WordPress**, **Drupal**, **JavaScript**, SCSS, MySQL, Gravity Forms, CRM integration, webhooks, **Figma**, **Docker**, **Git**, WCAG 2.1 AA.
- Built custom PHP themes and reusable templates with **WordPress**, **Drupal**, **ACF** and WPBakery from **Figma designs**.
- Developed dynamic content filtering and search using **JavaScript**, **jQuery**, AJAX and MySQL-backed queries.
- Implemented **responsive layouts** with SCSS, CSS Grid and Flexbox across desktop, tablet and mobile breakpoints.
- Remediated WCAG 2.1 AA issues identified through Google Lighthouse and WAVE accessibility audits.
- Integrated Gravity Forms with an **open-source CRM** using REST API endpoints, webhooks and a form processor.
- Debugged production PHP and JavaScript defects using Chrome DevTools and server-side error logging.
- Managed **Docker-based DEV environments**, **MySQL database syncs** and **Git branching** with peer code review.
- Conducted cross-browser and responsive testing on Chrome, Safari and iOS mobile devices.
- Established **CI/CD development pipelines**, automated validations and deployment workflows.

Web Application Developer

ANU Medical School

Jul. 2024 – Jul. 2025
Canberra ACT, Australia

- Description: Cell data visualisation and analysis platform providing multiple algorithms to identify and analyse cell populations, with integrated user and administrator portals.
- Technologies: Python (Flask), **JavaScript**, **HTML5**, **CSS3**, React, RESTful API, Material UI.
- Collaborated with researchers, analysed requirements, **translated ideas into working solutions**.
- Built real-time **interactive SPA** with insightful charts using **JavaScript**, ECharts, enhanced user experience.
- Designed RDS models using **SQL** and **SQLAlchemy**, organised large-volume data in a hierarchical structure ensuring data isolation.
- Developed back-end RESTful APIs and web app using Python, Flask, supporting real-time data visualisation.
- Refactored problematic UI components in accordance with Material UI best practices.
- Implemented high-performance **RESTful APIs** using Python, delivered PDF export feature to improve workflow.
- Implemented account management and authentication using Flask and JWT, improved security and multi-user access.
- Created unit tests using Pytest, validated core business logic and improved code quality.

EDUCATION

Master of Computing, Australian National University

Jul. 2023 – Jul. 2025

- **Key Modules:** Web Development, Software Engineering, Databases

Canberra ACT, Australia

Bachelor of Arts in Advertising, Sichuan Agricultural University

Sep. 2018 – Jul. 2022

- First-Class Academic Scholarship (Top 3% in Major)

Sichuan, China
